WORK EXPERIENCE

The University of British Columbia - Sauder School of Business
Teaching Assistant (Data Analysis and Visualization)

Jan 2023 - Apr 2023
Vancouver, BC

- Taught university students data querying, manipulation, and analysis using Advanced Excel, SQL, and R Studio, ensuring a strong foundation in data-driven decision-making.
- Designed and led interactive workshops on "Storytelling with Data," effectively instructing students in data visualization tools like Power BI and Tableau to enhance analytical communication skills.
- Assisted teaching faculty by conducting tutorials, facilitating lectures, and supporting examination processes, ensuring smooth course delivery and student engagement.
- Led targeted review sessions to reinforce complex concepts in data analysis and visualization, helping students gain confidence in applying analytical techniques in real world problems.

Sauder School of Business - Department of Learning and IT
Product Development Coordinator

May 2023 - Aug 2023
Vancouver, BC

- Designed and Developed an innovative presentation simulation tool utilizing advanced AV systems and cutting-edge hardware, creating immersive experiences that improved the performance of 70% students in the course.
- Integrated tools like ChatGPT and Descript for real-time speech-to-text transcription and feedback, enhancing user experience and engagement.
- Conducted comprehensive market research to identify user needs and scalability, securing \$60,000 in funding for further development of the product.
- Defined product vision through UX research, iterative testing, and psychographic profiling, ensuring robust product-market fit and user satisfaction.
